

## List of Posters

(in alphabetical order, according to presenting author)

No.	Author(s)	Title
P01	<u>Veronika Angerer</u> , Thomas Wallner and Annegret Wilde	Cph2 – a four colour light sensor produces c-di-GMP as a final output signal
P02	<u>Sarina Bense</u> , Juliane Düvel, Monika Schniederjans, Susanne Häußler	Transcriptional regulation of the PilZ domain protein FlgZ in <i>Pseudomonas aeruginosa</i>
P03	<u>Olga Besharova</u> , Verena Maria Suchanek, Victor Sourjik	Diversification of gene expression during biofilm formation by <i>Escherichia coli</i>
P04	<u>Johannes Gihardt</u> , Julian Schwanbeck and Fabian Commichau	Genomic adaptation of <i>Listeria monocytogenes</i> to lysozyme corroborates a role of a small RNA in controlling synthesis of cell wall modifying enzymes
P05	<u>Jan Gundlach</u> , Christina Herzberg, and Jörg Stülke	Cyclic-di-AMP synthesis is linked to potassium availability: KtrO is a novel potassium transporter in <i>Bacillus subtilis</i>
P06	<u>Susanne Herbst</u> , Olga Sarenko, Tina Jaenicke and Regine Hengge	Transmembrane redox and proteolysis control of c-di-GMP signaling in bacterial biofilm formation
P07	Heike Bähre, Roland Seifert, <u>Volkhard Kaefer</u>	HPLC-coupled mass spectrometry in cyclic nucleotide research
P08	<u>Gisela Klauck</u> , Diego O. Serra, Alexandra Poßling, Franziska Skopp, and Regine Hengge	Spatial organization of sigma factor activities and c-di-GMP signaling along chemical gradients in macrocolony biofilms of <i>Escherichia coli</i>
P09	<u>Elizaveta Krol</u> , Petra Gnau, Christina Klaner, Neda Farmani, Lars-Oliver Essen, Anke Becker	Cyclic mononucleotide signaling in the symbiotic alpha-proteobacterium <i>Sinorhizobium meliloti</i>
P10	<u>Sofya Kuzmich</u> , Dorota Skotnicka, Lotte Søgaard-Andersen	Function of the c-di-GMP phosphodiesterase PmxA in <i>Myxococcus xanthus</i> development
P11	Wieland Steinchen, <u>Devid Mrusek</u> and Gert Bange	Towards a complete structural and functional understanding of RelA
P12	<u>Fabian Müller</u> , Lisa-Marie Bittner, Jan Arends, Michael Schäkermann, and Franz Narberhaus	The role of (p)ppGpp in conditional proteolysis in <i>Escherichia coli</i>
P13	<u>Sara Alina Neumann</u> und Natalia Tschowri	C-di-GMP-controlled developmental phenotypes in <i>S. venezuelae</i>
P14	<u>Vanessa Pfiffer</u> and Regine Hengge	Multiple sensory input into the biofilm matrix-controlling diguanylate cyclase DgcE of <i>Escherichia coli</i>
P15	<u>Martina Rüger</u> , <u>Katrin Gerbracht</u> , Yi Li, Sabrina Heine, Michael Entian, Susanne Zehner, Karin Sauer & Nicole Frankenberg-Dinkel	The role of the phosphodiesterase NbdA in NO-induced dispersal of <i>Pseudomonas aeruginosa</i>
P16	<u>Olga Sarenko</u> and Regine Hengge	Local c-di-GMP signaling by a network of interacting GGDEF/EAL domain proteins in <i>E. coli</i> biofilm control
P17	<u>Heinrich Schäfer</u> , Noël Molière, Anja Heinz, Armgard Janczikowski & Kürşad Turgay	Curbing protein synthesis is important for the concerted heat shock response of <i>Bacillus subtilis</i>
P18	Sandra Schwarz	Oxygen-dependent regulation of a diguanylate cyclase lacking canonical sensory and regulatory domains in <i>Pseudomonas aeruginosa</i>
P19	<u>Gerd Seibold</u> , Oliver Goldbeck, Sebastian Reich	Identification of mechanisms for potassium-dependent control of c-di-AMP levels in <i>Corynebacterium glutamicum</i>

- P20 Diego O. Serra, Kaveh Yousef, Max von Kleist and Regine Hengge Heterogeneity of amyloid curli and cellulose production is based on a c-di-GMP-dependent switch and is essential for morphogenesis and structural stability of *Escherichia coli* macrocolony biofilms
- P21 Franziska Skopp, Susanne Herbst, Viola Nicolaysen and Regine Hengge A novel *E. coli* transcription factor with an unorthodox c-di-GMP binding mode
- P22 Dorota Skotnicka, Tobias Petters, Eleftheria Trampari, Volkhard Kaever, Jacob G. Malone & Lotte Søgaard-Andersen A Minimal Threshold of c-di-GMP Is Essential for Fruiting Body Formation and Sporulation in *Myxococcus xanthus*
- P23 Kai Thormann Role of the phosphodiesterase PdeB in localized c-di-GMP regulation
- P24 Albrecht Völklein, Tom Landgraf, Harald Schwalbe NMR screening of RNA secondary structure and binding of bacterial secondary messenger
- P25 Martin Weiß and Jörg Stülke A protein in search of a function: The c-di-AMP-binding protein DarA of *Bacillus subtilis*
